LAB TECHNICIAN

CHECKED BY

DR. ZUBAIR HASAN, MD(PATH)DNB
KMC NO-80661
CONSULTANT PATHOLOGIST

PATIENT NAME	MRS. SAMIUNNISSA	DATE	10.10.2025
AGE	53 YEARS	SEX	FEMALE
REFERRED BY	DR. PRIYA KUMAR	BILL NO:	8085

ULTRASOUND OF PELVIS

FINDINGS:

Urinary Bladder is well distended. Wall thickness is normal.
No evidence of calculi, mass or mural lesion.

Uterus: Is anteverted and bulky in size, measures 9.3 x 6.5 x 6.9 cms.
Multiple fibroids noted, largest measuring 4.3 x 3.7 x 4.2 cm in subserosal location of anterior wall – FIGO 6.
Calcified fibroid noted in posterior wall measuring ~ 1.8 cm.
Endometrial echoes are normal. Endometrium measures 5.9 mm.

Right ovary: normal in size and echopattern, measures 2.2 x 1.8 cms.

Left ovary: Shows a well-defined anechoic cystic lesion measuring 3.8 x 1.1 x 1.6 cm, volume 4 - 5 cc. Residual left ovarian parenchyma measures 2.1 x 1.1 cm.

Both adnexa: Normal. No mass is seen.

POD: There is no free fluid in the POD.

IMPRESSION:

- BULKY UTERUS WITH MULTIPLE FIBROIDS.
- LEFT OVARIAN SIMPLE CYST.

DR. CHAATHURYA.R MD RD
Consultant Radiologist.

This is only a radiological impression and not a diagnosis. Like other investigations, radiological investigations also have limitations. Therefore radiological reports should be interpreted in correlation with clinical and pathological findings.

ULTRASOUND PELVIS (TAS)

FINDINGS:

Urinary Bladder is well distended. Wall thickness is normal. No evidence of calculi, mass or mural lesion.

Uterus: Is anteverted and **enlarged in size with distorted contour** measuring 11.2 x 8.4 x 6.3 cms. Endometrium measures 3.7 mm.

Multiple tiny round to ovoid heterogeneously hypoechoic lesions with whorled appearance and minimal internal vascularity noted in anterior and posterior myometrium with measurements ranging between 1 to 3 cms – suggestive of fibroids.

2 x 2 cm similar looking lesion with calcification, posterior acoustic shadowing in posterior myometrium – likely calcified fibroid.

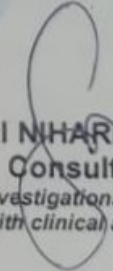

Both ovaries are normal in size and echopattern.

Both adnexa: Normal. No mass is seen.

There is no ascites.

IMPRESSION:

- BULKY FIBROID UTERUS.

DR. SAI NIHARIKA GAVVALA MD RD
Consultant Radiologist

REF.BY.	DR.BIBI AYESHA	DATE	14/04/2025

ABDOMINOPELVIC SONOGRAPHY

CLINICAL HISTORY:- DIFFUSE PAIN *Abdomen.*

Liver: Measures: 14.6 **cms** Normal in size, shape and **shows diffuse increase in echotexture** . No evidence of focal mass lesion. No IHBR dilatation. Portal and hepatic vein radicals are normal.

Portal vein & CBD : Normal in caliber.

Gall bladder: Well distended, normal wall thickness. No calculi.

Spleen: Normal in size, shape & echotexture. Measures: 10.6 **cm.**

Pancreas: Head, body and tail normal in size, shape and echotexture.

Kidneys: Both kidneys are normal in size, shape, situation & echotexture.

There is no hydronephrosis / scarring / calculus appreciated in both kidneys. Corticomedullary differentiation is maintained.

Measurements: Right kidney: 10.3 x 1.2 **cm** and Left kidney: 10.9 x 1.3 **cm.**

Para aortic and Pericaaval areas: No abdominal lymphadenopathy.

RIF: No mass / collection.

Urinary Bladder: Normal in contour. **Wall thickened measuring 5 mm.**

No evidence of calculi/ mass.

Uterus: **Bulky in size**, normal shape and echotexture. **Measurements:** L: 10.1 cm, AP: 6.2 cm, TR: 7.9 cm.

Myometrium: **Multiple intramural fibroids noted measuring 1.3 to 2.8 cms**

Endometrium: Measures: 3 **mm.** Cervix: Normal.

Ovaries: Both ovaries are normal in size and echotexture.

Measurements: **Right ovary:** 2.7 x 2.2 cm. **Left ovary:** 2.5 x 2.1 cm.

No evidence of pleural effusion. No ascites.

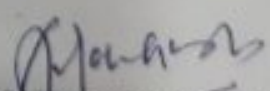

No adnexal mass/cyst.

IMPRESSION:

1. **FATTY LIVER (GRADE I).**
2. **BULKY FIBROIDS.**
3. **THICKENED URINARY BLADDER WALL.**

SUGGEST : URINE ROUTINE.

ULTRASOUND ABDOMEN AND PELVIS

CLINICAL DETAILS: Follow up.

FINDINGS:

Liver is normal in size and shows diffusely increased hepatic echogenicity observed. Diaphragm is still maintained. No intra or extra hepatic biliary dilatation. Portal vein is normal in size, course and caliber.

Gall bladder is normal without evidence of calculi, wall thickening or pericholecystic fluid. CBD is not dilated.

Pancreas to the extent visualized, appears normal in size, contour and echogenicity.

Spleen is normal in size, shape, contour and echopattern. No evidence of mass lesion.

Right Kidney is normal in size (measures 10.2 cm in length, 1.4 cm in pararenal fat thickness) and echopattern. Corticomedullary differentiation is maintained. No hydronephrosis.

Left Kidney is normal in size (measures 11.0 cm in length, 1.5 cm in pararenal fat thickness) and echopattern. Corticomedullary differentiation is maintained. No hydronephrosis.

Retroperitoneum – No significant lymphadenopathy.

Urinary Bladder is well distended. Wall thickness is normal. No evidence of mass lesion.

Uterus: Is anteverted and bulky in size, measures 9.0 x 4.9 x 5.5 cms. Multiple fibroids noted, largest measuring 4.3 x 3.6 x 3.6 cms in subserosal location (FIGO VI).

Calcified fibroid noted in posterior wall measuring 2.4 cms (FIGO IV). Endometrial echoes are normal. Endometrium measures 4.1 mm.

Both ovaries are normal in size and echopattern.

Right ovary: measures 2.1 x 1.6 cms. Left ovary: measures 2.0 x 1.5 cms.

Both adnexa: Normal. No mass is seen.

There is no ascites.

IMPRESSION:

- GRADE II FATTY LIVER.
- BULKY UTERUS WITH FIBROIDS.

---AS COMPARED TO PREVIOUS USG REPORT DATED 10.10.2025 THE UTERINE FIBROIDS AND RESOLUTION OF LEFT OVARIAN CYST
